

## Ribbons of wood

Paul Schürch has studied woodworking in Switzerland, Japan, England and Italy and now runs a furniture studio in Santa Barbara, Calif. Some of his recent work is enlivened by lemon-wood ribbons inlaid on veneered backgrounds. Shaded with hot sand, the ribbons look real enough to touch. This 21-in. by 42-in. table is elm burl with olive borders; the dragonfly is made of lapis, marble and copper wire.
